

Tan & Jaeger (2025):

- for exposure blocks, only unlabeled trials were included for analysis
- the full factorial interaction of VOT, block, and exposure condition, along with the maximal random effect structure (by-participant intercepts and slopes for VOT, block, and their interaction, and by-item intercept and slopes for the full factorial design; see SI, §5.1)
- results from Bayesian mixed-effect vs. simple mixed-effects logistic regressions aligned

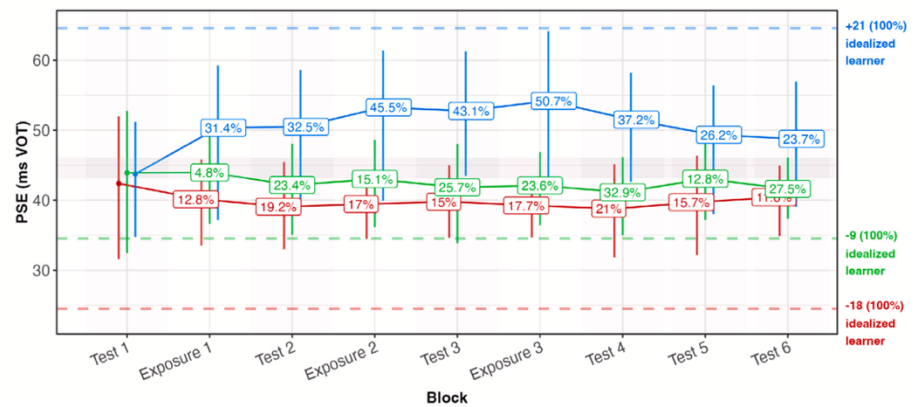

A)

B)

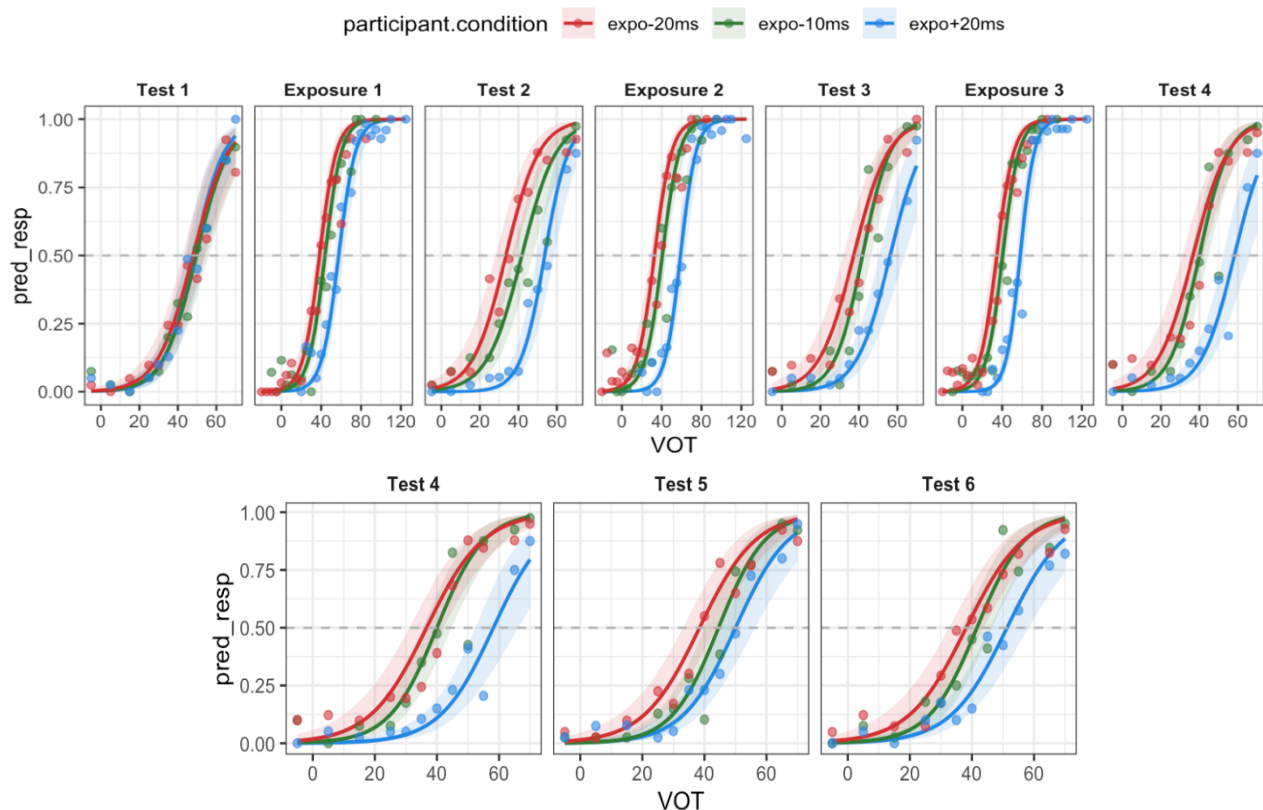

C)

Our results:

- $\text{glmer}(\text{resp.num} \sim \text{VOT} * \text{exp_stageID} * \text{participant.condition} + (1 + \text{VOT} | \text{ID}) + (1 | \text{stim}))$ for preliminary analysis

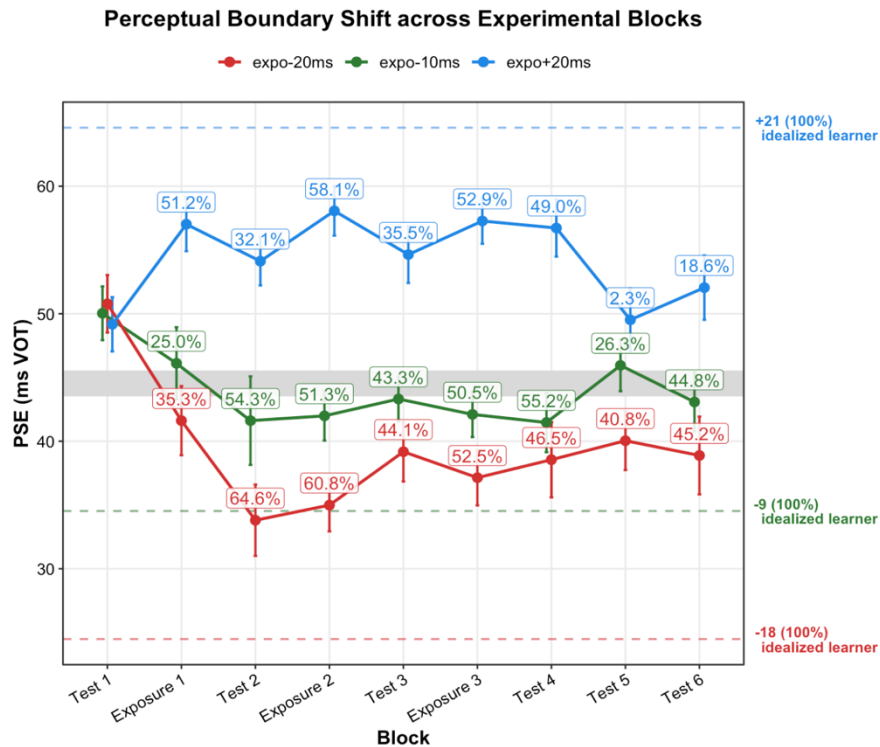

Proportion of adaptation calculated based on the ideal target estimated in Tan & Jaeger (2025)

$\% = (PSE - PSE_{test1}) / (\text{expected PSE} - PSE_{test1})$

expected PSE in TJ2025 → -20ms: VOT 24.5ms; -10ms: VOT 34.5ms; +20ms: VOT 64.5 ms

gray area – prior PSE as simulated in TJ2025: set as 44.53 +/-1ms for now

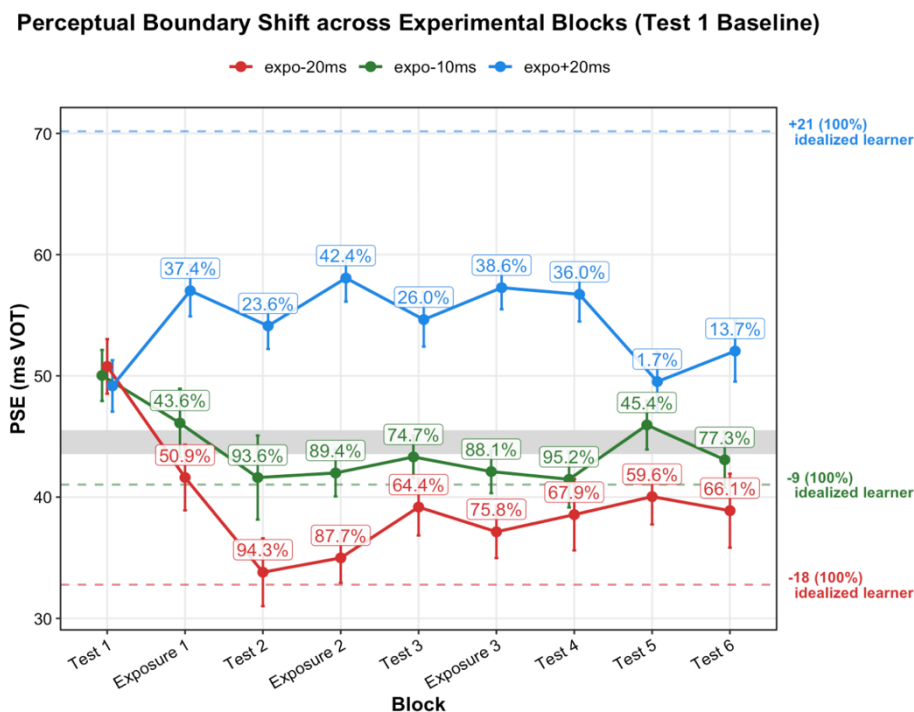

Proportion of adaptation calculated based on the ideal amount of shift relative to Test 1 performance

$\% = (PSE - PSE_{test1}) / \text{expected PSE delta}$

expected PSE delta in TJ2025: -20ms: -18; -10ms: -9; +20ms: +21

gray area – prior PSE as simulated in TJ2025: set as 44.53 +/-1ms for now

Summary statistics of PSE data across blocks in different exposure conditions

Exposure -20ms:

exp_stageID	participant.condition	N	PSE	SD	SE
Test 1	expo-20ms	41	50.78049	7.363465	1.1499800
Exposure 1	expo-20ms	41	41.61707	8.848133	1.3818462
Test 2	expo-20ms	41	33.80732	9.139185	1.4273008
Exposure 2	expo-20ms	41	34.99024	6.708905	1.0477549
Test 3	expo-20ms	41	39.18049	7.626409	1.1910449
Exposure 3	expo-20ms	41	37.14390	7.094612	1.1079923
Test 4	expo-20ms	41	38.55610	9.624839	1.5031473
Test 5	expo-20ms	41	40.04390	7.502968	1.1717667
Test 6	expo-20ms	41	38.88537	9.958051	1.5551863

Exposure -10ms:

exp_stageID	participant.condition	N	PSE	SD	SE
Test 1	expo-10ms	40	50.03500	6.794777	1.0743486
Exposure 1	expo-10ms	40	46.11250	9.128040	1.4432699
Test 2	expo-10ms	40	41.61500	11.194219	1.7699614
Exposure 2	expo-10ms	40	41.99250	6.242755	0.9870663
Test 3	expo-10ms	40	43.31500	5.671184	0.8966930
Exposure 3	expo-10ms	40	42.10750	5.743643	0.9081496
Test 4	expo-10ms	40	41.47000	7.498417	1.1856038
Test 5	expo-10ms	40	45.95000	6.522584	1.0313111
Test 6	expo-10ms	40	43.08250	7.518486	1.1887770

Exposure +20ms:

exp_stageID	participant.condition	N	PSE	SD	SE
Test 1	expo+20ms	40	49.17250	6.860589	1.0847544
Exposure 1	expo+20ms	40	57.02000	6.825413	1.0791925
Test 2	expo+20ms	40	54.12000	6.139331	0.9707135
Exposure 2	expo+20ms	40	58.06750	6.267883	0.9910393
Test 3	expo+20ms	40	54.64000	7.196751	1.1379063
Exposure 3	expo+20ms	40	57.27250	5.755621	0.9100436
